ID'd Challenges

- ▶ Legislation complexity
- ▶ Collaborations required
- ▶ Delivery agencies, roles and processes
- ▶ Policy congruence
- ▶ Land prices and agricultural expansion/drive
- ▶ Planning and zoning
- ▶ Cumulative impacts
- ▶ Human behavior
- ▶ Recognition of wetland benefits
- ▶ Historic drainage vs new drainage management
- ▶ Resource constraints
- ▶ Peatland management

Policy Framework

Regulations “Sticks”

Spatial Planning

Direct Regulations

Landscape Planning

Environmental Thresholds

Regional Planning

Natural Resource Management Standards

Local Development & Sectoral Planning

Decree & Prohibitions

Environmental Impact Assessment

Nature Conservation

Steering intrinsic & extrinsic motivation

Market Intervention “Carrots”

Ownership Rights

Positive & Negative Incentives

Emission Certificates

Environmental Tax & Penalty

Payments for Ecosystem Services (State, Market, Civil Society)

Licences

Tax Relief

Environmental Fiscal Transfer

Subsidies (e.g. Single Farm Payments)

Environmental Offset & Banking

Steering decision-making

Information “Sermons”

Voluntary Agreements

Suasory Measures

Consensus-based Negotiation Processes

Environmental Education

Plea for ethical Decision-making

Social non-monetary Sanction

Steering intrinsic motivation

A few questions...

- ▶ What instrument do organizations want to use?
 - ▶ What do you need to support the implementation?
 - ▶ What information do NGOs (and others) require?
 - ▶ What tools are need to support regulatory instruments?
- ▶ Is it cheaper/better to regulate or incentivize?
 - ▶ Landowner rights (perceived or real) vs. public good
 - ▶ Polluter pay vs. public pay (Focusing on agriculture)
- ▶ What instruments are needed for what wetlands? And associated tools?
 - ▶ Class I and II vs. Class III+

Policy Tools Potential Projects (from 3:30am)

1. Systematic review and synthesis of regional policies - **Legislative Context**
 - ▶ Legislation, regulation, operating policies, directives
 - ▶ Assessment of perverse incentives
 - ▶ Identification of complementary policies
2. Wetland assessment / valuation system - **Guidance Documents**
 - ▶ Wetland classification systems
 - ▶ Restoration and monitoring protocols
3. Reference Wetland Network - **Restoration Protocols**
 - ▶ Identification and monitoring of “good” wetlands in a variety of situations
 - ▶ Urban, Rural (cropped vs. perennial),
 - ▶ Prairie vs. parkland,
 - ▶ East vs. West
4. Creation of a Association of Provincial Wetland Managers - **Collaboration**

Evidence-Informed Decision-Making: Information and Tools

- Increase your understanding of evidence-informed decision-making
- Look at examples that illustrate use of evidence-informed decision-making
- Build your capacity for the overall process of evidence-informed decision-making
- Develop an overall strategy to find evidence
- Consider specific sources of evidence
- Judge the quality of information you have found
- Apply the synthesized evidence to your situation

Public Health Competencies: Information and Tools

- Public Health Science
- Assessment & Analysis
- Policy & Program Planning, Implementation & Evaluation
- Partnerships, Collaboration & Advocacy
- Diversity & Inclusiveness

Health Indicators

- Canadian Health Indicators
- Provincial/Territorial
- International Organisations
- Health Indicators from Other Countries

Planning Public Health Programs: Information and Tools

- Clarify context, assumptions and overall public health framework for planning
- Collect evidence to support program plan
- Design program based on evidence
- Establish indicators of success
- Develop an evaluation plan
- Manage the project
